Item No. _____

Job No. _____

Provides high visibility and easy 4-way access. Ensures quick and efficient inventory control. Ideal for mobile storage requirements. Allows air to circulate throughout, eliminating dust and dirt build-up. Allows you to keep linens, food items, stocked products and other regularly used items on hand, throughout the workplace.

TRUCK: Consists of 4 posts, 4 wire shelves, plastic shelf clips, donut bumpers and 5" dia. swivel casters. Posts are 63"H. Overall truck height is 69". Load capacity or polyurethane wheel stem casters that have a 1200 lb. load capacity or 8" full pneumatic stem casters with a 1200 lb. capacity.

SHELVES: Constructed of open wire design offering greater light penetration and visibility, lighter weight, air circulation and minimal dust and dirt accumulation.

POSTS: 1 in. O.D. round tubing, 16 gauge (0.062 in.) thickness. Rolled grooves spaced at 1 in. on centers along their length. The top of the post have a finished plastic cap and the post bottom have a die cast insert with adjustable leveling foot. At each rolled groove there are consecutive numbers starting at the bottom of the post to facilitate installation of clips.

METHOD OF ASSEMBLY: Frustal-Conical design incorporating a two part tapered plastic sleeve. Engagement and locking are accomplished with a protruding bead on the inner circumference of the plastic sleeve which will match the groove on the post. Two plastic sleeves attach to each corner post for each shelf. Both the sleeves and the corner fitting of the shelves have the identical taper to create a wedge effect, thereby locking the shelf securely in a rigid position. No screws or other fittings are required for assembly. Shelves vertically adjust on 1 in. increments.

FINISHES: Shelves and Posts are available in seven finishes:

- (A) **SILVER EP:** Finish consists of a silver epoxy powder coat over a rust inhibiting undercoat.
- (B) **BLACK EP:** Finish consists of a black epoxy powder coat over a rust inhibiting undercoat.
- (C) ***POLY-Z-BRITE:** Features a true clear powder-epoxy over zinc-chromate electro-plating that ensures a strong durable finish and handles temperature and moisture extremes well. Ideal for dry storage, coolers and freezers. Includes NEXGard, an anti-microbial agent that protects the epoxy coating from bacteria, mold and mildew that causes stains, odors and product degradation.
- (D) ***POLY_GREEN:** Features a true green powder-epoxy over zinc-chromate electro-plating that ensures a strong durable finish and handles temperature and moisture extremes well. Ideal for dry storage, coolers and freezers. Includes NEXGard, an anti-microbial agent that protects the epoxy coating from bacteria, mold and mildew that causes stains, odors and product degradation.
- (E) **CHROME:** Brite, high gloss chrome over nickel electro plating.
- (F) ***NEXELON:** Blue metallic epoxy powder coat electrostatically applied over zinc-chromate electro plating and chemical conversion under coat protected by NEXGard, an antimicrobial agent that protects the epoxy coating from bacteria, mold and mildew that causes stains, odors and degradation.
- (G) **STAINLESS STEEL:** Type 304 electropolished high gloss finish.
